DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 12-22, drawn to a method and an apparatus for controlling a stepping motor, classified in class 318, subclass 685.
 - II. Claims 10-11 and 23-24, drawn to a method and an apparatus for controlling a heater, classified in class 348, subclass 151.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a distinct purpose. The invention recited in the first set of claims is used to control the position of the stepper motor which drive/rotate the surveillance camera and the invention recited in the second set of claims is used to control the temperature inside the housing enclosing the surveillance camera.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2837

Applicant is advised that in order for the reply to this requirement to be complete, the response must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
